

Interview/survey homework

For this assignment you have four choices. These choices are intended for you to get the most out of the assignment. If you are not going to be using survey or interview methods for your senior project you should choose either option 3 or 4. If you are using interview or survey methods please choose option 1 or 2. You may do this as a group project, but I will need to ok your groups' project.

1. If you will be doing interview methods for you project please write your own interview questions and then interview one person using your interview guide. You will then need to type up 15 minutes of the taped conversation and a one page summary of the interview.
2. If you plan to write your own survey then you can write up your questions and administer your survey to one person. Then write a one page paper summarizing how the survey pre-test went. Were there any "bad" questions? Did you learn anything interesting from just surveying one person?

If you are not using interview or survey methods

3. Find a survey on-line or from one of your journal articles and test it on 10 people. Then write a one-page summary article describing your findings. Also tally the results and give us the results of the survey.
4. If you would like to try interviewing you may borrow interview questions from an article or use exercise 10.1, in the book page 294. You will then need to interview three people. Provide a 15 minute transcript of ONE of the interviews. Then write a one-page summary which explains your findings. Were there any similarities? What were the differences? Did you find anything interesting?
