

Purple Coneflower

Echinacea

Exposure: Full sun to part shade
Flowers: Rose - Purple
Bloom Time: June thru August
Height: 36"
Width: 18"
Soil: Widely adaptable; tolerates poor
Pests/Problems: Few
Zones: 3 - 9

Drought tolerant, native perennial; Attracts butterflies; Naturally spreads by seeds dropping at end of season; After blooming, stalks can remain for winter interest and to attract birds which feed on the seeds, cut back in the spring; If preferred, cut stalks after bloom to control spreading
